EXPERIENCE

NIAEFEUP - Informatics Student Branch Member

Dec. 2021 - Present

- NIAEFEUP is a student branch with more than 80 members/recruits.
- Opportunity to develop software for the student community, while also organizing and participating in events and workshops.

SINF - Semana de Informática Informatics Team Member

Jun. 2023 - Oct. 2023

- The biggest event held by NIAEFEUP, SINF promotes student interaction with the business world and allows them to improve their skills in computing and more, regardless of their area of expertise.
- Contributed to the development of the event's website, using Laravel Jetstream + Inertia. The 2023 edition's website is built from the ground up by a considerably small team of developers.

PROJECTS

Bot of Greed - Discord Bot Personal Project

Sept. 2022 - Present

- A Discord bot which displays information about cards from the "Yu-Gi-Oh!" trading card game, using Python and the Disnake API wrapper. Boasting an extensive search feature and mini-games, this project was made out of interest in exploring the Discord API, and the drive to create something useful and enjoyable for fans of the game.

Online Shop Course Unit Project

Sept. 2022 - Jan. 2023

- An online shop for music related products, built with Laravel, HTML/CSS and JavaScript. The project was divided into several deliverables, each one focusing on different aspects of web development, such as Wireframing, Database Modelling, Prototyping, etc.

New Website for NIAEFEUP Informatics Student Branch Project

Dec. 2022 - Present

- A brand new website for the Informatics Student Branch, built using SvelteKit and TailwindCSS in the frontend, while the backend uses Kotlin and Spring Boot. Mostly familiar with the frontend of the project.
